Baltic Storage Platform is a joint venture between Evecon, Corsica Sole and Mirova, developing two battery storage parks in Estonia with a combined capacity of 400 MWh.

Estonia is building the largest battery park in continental Europe, boosting energy security and supporting the transition to renewables.

The EUR100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of 200 MW and a total storage capacity of 400 MWh, putting ...

Summary: Estonia's power plant energy storage initiatives are reshaping the country's renewable energy landscape. This article explores the project's goals, technological innovations, and how it addresses ...

Summary: This article explores how the Tartu Energy Storage Power Station addresses Estonia's renewable energy challenges. Discover cutting-edge battery technologies, regional energy trends, ...

The firm behind the energy storage project is the Estonian startup Zero Terrain, and they are not shy about the touting the supply chain advantages of hydropower over other systems.

KIISA, ESTONIA - February 3, 2026 - The Baltic Storage Platform (BSP) - a joint venture between Baltics leading renewable energy developer Evecon, French independent solar power ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into regional ...

Recently, Estonia welcomed its largest solar park, capable of powering 35,000 households, now another such step is the development of two battery energy storage systems in Harju County, North Estonia.
