Supports optional communication cards that allow remote access via the HTTP(S), SNMP, MODBUS TCP/IP, Modbus RTU and BACnet IP protocols. Manage your power devices in your physical or virtual ...

These products integrate the latest energy management technologies and environmentally friendly materials, aiming to promote the green transformation of communication networks from source to ...

Maintenance bypass cabinet with output transformer. The maintenance bypass isolates the UPS completely during service operations. The output transformer converts the 480 V output of the UPS ...

The outdoor communication integrated power cabinet solution is designed for industries such as government, power, military, banking, telecommunications, education, hospitals, airports, railways, ...

Scalable Power Output: With load power options ranging from 3kw to 50kw, this product is adaptable to various applications, from small-scale to large-scale operations, allowing users to choose the power ...

IP55-rated cabinet with compartmentalized design + top air-cooling = rainproof & dustproof. Plug-and-play terminals + modular assembly = zero maintenance ...

The Eaton 93PM UPS is a high power density solution. In a footprint of just 0.5 m², it can provide full rated power and standard backup time with internal batteries.

The UPS system is designed with modular architecture, where each module operates independently and contains its own components, including power converters, inverters, and battery systems.

The Base Station Energy Cabinet is a fully enclosed, weather-resistant telecom energy cabinet designed to provide reliable power distribution and battery backup for outdoor communication networks.
