Can a microgrid be financed by a utility privatization?

Utility privatization (UP) can be a potential approach for financing microgrid implementation if an agency has the appropriate authority to enter into this type of agreement.

Can microgrids be financed?

Microgrids can be financed if the components (and potentially the entire system) can be justified economically and paid for out of energy savings or avoided costs.

Can a microgrid be a life-cycle cost effective project?

If a microgrid is cost effective over its entire life-cycle, it can be implemented using private funding under federal performance contracting mechanisms, such as a Utility Energy Service Contract (UESC) or Energy Savings Performance Contract (ESPC).

Does implementing a microgrid reduce energy costs?

Implementing a microgrid reduces annual energy costs. It also decreases the power needed for critical loads, which can result in a reduced size and cost of the microgrid.

Microgrids face financing challenges due to higher per-unit costs, regulatory uncertainties, and complex revenue models compared to conventional power infrastructure. Despite the ...

We can help you build a more resilient, efficient and sustainable energy infrastructure by developing a microgrid system suited to your specific needs. We also offer microgrid project financing for an end-to ...

Viking Equipment Finance provides equipment financing for small to mid-sized companies seeking \$50,000 to \$50 million to purchase or refinance essential use equipment and machinery...

Contract between a federal agency and an energy service company (ESCO) to procure energy conservation measures (ECMs) without additional appropriations. Uses long-term ESPC authority for ...
