---

Explore the evolving battery production landscape in China, India, Japan & South Korea. Get insights on market trends, investments, gigafactories & policy impacts. An analysis of the latest ...

From smartphone batteries to grid-scale storage solutions, Asian lithium battery factories have become the backbone of modern energy storage systems. Let's explore how this industry shapes our ...

We recently presented a webinar which drew on expertise from our Energy Storage research team to explore the unique commercial and technological opportunities driving demand for ...

China holds the lion's share in the regional and global lithium-ion battery market, accounting for over 60% of the world's cell manufacturing capacity. Major players like CATL, BYD, ...

According to forecasts, the demand for lithium could increase 20 times by 2050. While recycling facilities can currently recover nearly all the cobalt and nickel used in battery cells, recent ...

Southeast Asia's battery storage market is set to hit USD 5 Bn by 2030, driven by policy, tech shifts, and energy demands in Vietnam, Philippines & Thailand.

Battery Energy Storage System is growing in Asia. Discover the smart ways to power resilient infrastructure across the region.

Rising electric-vehicle mandates, fast-tracking of 5G telecom towers, and utility-scale solar-plus-storage procurements are lifting lithium-ion demand while squeezing legacy lead-acid ...

The Asia Pacific lithium-ion stationary battery storage market size exceeded USD 82.3 billion in 2024 and is expected to grow at a CAGR of 30.3% from 2025 to 2034, driven by the need to store ...

By bridging the gap between academic research and real-world implementation, this review underscores the critical role of lithium-ion batteries in achieving decarbonization, integrating ...
