-----

The bottom half of the System Summary page displays a graphic of the battery cabinet, a list of all the secondary processing units (SPUs), and status of the digital inputs/outputs (Fig. 20).

Connect the power system's battery cable terminated in an Anderson connector to the first battery cabinet's battery cable terminated in a mating Anderson connector.

The option provides functional access to the equipment circuit breaker via a handle located on the exterior of a cabinet door that is physically connected to the circuit breaker in the cabinet's interior.

The term line-up-and-match refers to battery cabinets that are physically attached to the UPS, share internal wiring, and use the battery cabinet breaker as the battery isolation device.

Each cabinet is supplied with a mechanical ground lug attached to the circuit breaker mounting plate, that accepts stranded copper wire from #14 AWG to 1/0 cable sizes.

Arimon UPS backup battery cabinets offer breaker or fuse protection up to 800 Amps. UPS circuit breaker options include auxiliary contacts, undervoltage release (UVR) and shunt trip circuit ...

Unified Power offers a complete line of battery cabinets for both UPS and Telecom Applications. These cabinets can be configured to match OEM cabinets and offer a competitive option for system ...

Mechanical robustness, approved electrical disconnects and high quality C& D batteries all combine to provide an easily installed complete battery system with the finished appearance of a UPS cabinet.

Use a multimeter to measure the voltage of the battery group, which should be at least 36Vdc for the SolaHD S4K2U36BATD, 48Vdc for the SolaHD S4K2U48BATD, and 72Vdc for the SolaHD ...

The battery cabinet should be connected to the load through a DC disconnect switch or a DC circuit breaker.

## Battery cabinet circuit breaker unit field

This allows the battery to be disconnected from the load and charger for maintenance ...
