Vasco da Gama CoLAB (VG CoLAB) is a collaborative laboratory in Porto, Portugal, dedicated to developing innovative energy storage technologies, including vanadium redox flow batteries and ...

Explore how Battery Energy Storage Systems (BESS) in Porto are revolutionizing renewable energy integration, grid stability, and industrial efficiency. Discover key trends, data-driven insights, and ...

Portugal is firmly committed to achieving carbon neutrality by 2050. A cornerstone of this strategy is the integration of Battery Energy Storage Systems (BESS) to support its rapidly ...

VG CoLAB develops innovative energy storage technologies through functional prototypes, focusing on battery cell scale-up, battery modules, and power electronics.

Summary: Porto, Portugal, is emerging as a hub for innovative energy storage battery projects, integrating renewable energy solutions and smart grid technologies. This article explores key ...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

The Portuguese Environment Agency's Participa portal currently features two big renewables-plus-battery project proposals.

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

This article explores how energy storage batteries are reshaping power management in Portugal's second-largest city, offering actionable insights for businesses and municipalities.

Shared energy storage projects are transforming how communities and businesses manage renewable energy.
