The lab will pool the expertise of the three institutions to advance the development of sustainable battery technologies. The joint research infrastructure will also be open to industry for ...

With technological innovation as its core, it is committed to providing efficient, safe, and reliable lithium Berlin battery solutions for global consumers.

The Federal Institute for Materials Research and Testing (BAM), the Helmholtz-Zentrum Berlin (HZB), and Humboldt University of Berlin (HU Berlin) have signed a memorandum of ...

The BBL unites the expertise of HU, HZB, and BAM to establish Berlin as a hub for researching sustainable battery technologies, such as sodium-ion, lithium-sulfur, and sodium-sulfur batteries.

Complementing this research, BAM has partnered with Helmholtz-Zentrum Berlin (HZB) and Humboldt University Berlin (HU) to establish the Berlin Battery Lab. This collaboration will pool ...

With \$7.5 million in seed funding, the startup plans to bring to market large-scale battery storage systems that are critical to the stability and efficiency of the power grid.

BERLIN, 20th March 2025 - Germany is moving to the forefront of battery technology, as Berlin-based theion today announced the successful closing of a EUR15 million Series-A funding round to accelerate ...

Berlin has established itself as an important location for research into sodium-ion batteries and lithium-sulfur batteries. The city offers concentrated expertise in these areas, supported by ...

Storage technologies are essential for the energy and mobility transition - which is why the State of Berlin is giving high priority to building a strong economic ecosystem for battery technologies.
