Hydrostor's late-stage projects in New South Wales, Australia, and California, US, are scheduled to begin construction in 2025. Its A-CAES technology supports energy storage, helping ...

Hydrostor leverages a proven technology solution for delivering long duration energy storage (eight hours or more) to power grids around the world.

With a growing 7 GW Pipeline, these projects build off the success of our 2 MW Goderich Energy Storage Centre, the worlds first commercially contracted Advanced Compressed Air Energy Storage ...

In Compressed Air Energy Storage (CAES), air is compressed and stored in underground structures like mines, aquifers, salt caverns or old oil reservoirs, or in aboveground pressure vessels. ...

The new \$200M investment will support Hydrostor's 500 MW / 4,000 MWh Advanced Compressed Air Energy Storage (CAES) project in Ontario's Lennox and Addington County, known ...

Long-duration energy storage solution provider Hydrostor announced that it has secured \$200 million in financing, with proceeds supporting the development of its projects to supplement ...

Canada's energy sector is increasingly embracing energy storage technologies, with stakeholders recognizing their role in the transition to clean energy. The Canadian government ...

Toronto, Ontario-headquartered Hydrostor has secured a US\$200 million investment for its advanced compressed air energy storage (A-CAES) projects both in Canada and globally.

Cache Power has commissioned an engineering study for a 640 MW compressed air energy storage and hydrogen project in Alberta, supported by provincial funding.

Canadian compressed air energy storage project

MISSISSUAGA, ON, December 02, 2025 -- EllisDon has partnered with Cache Power to deliver Canada's first commercial scale Compressed Air Energy Storage ("CAES") facility in Northeast ...
