China s first wind power plant

China just proved it does. The question is how quickly it can scale, and what happens to energy markets when harvesting power becomes as simple as launching a balloon into the jet stream.

Data and information about Wind power plants and their location plotted on an interactive map of China.

China has ranked first worldwide in installed wind power capacity for 15 consecutive years. The country"s wind power capacity has expanded to 600 million kW by the end of November ...

China has successfully completed the first flight of its home-designed floating wind turbine, the S1500, in Hami, Xinjiang. The system passed strict tests, including full desert assembly ...

Wind power could soon come from the sky as China has successfully tested a megawatt-class airborne turbine that generates electricity while hovering 2000 metres up.

ZHANGZHOU, June 28 (Xinhua) -- The phase II project of Zhangpu wind farm, China"s first offshore wind farm with the largest single-capacity turbines, was connected to the grid for power generation ...

In western China"s Xinjiang region, a prototype of the world"s most powerful flying wind turbine, the S1500, developed by Beijing-based startup Saw Energy Technology, was successfully ...

From steppe to power source, China"s wind energy sector is revolutionizing the country"s electricity supply and taking on a global leadership role. With its vast landmasses in the north and...

The China Longyuan Electric Power Group Corp., another subsidiary of China Guodian Corporation, was an early pioneer in wind farm operation; at one point it operated 40% of the wind farms in China.

May 1986: China"s first grid-connected demonstration wind farm, boasting three 55-kilowatt wind turbine generators from Denmark, is built in Malan Bay, Rongcheng, Shandong province.
