In the early 1970s, Motorola produced the Base Station with Encoder, which was normally found in hospitals and dispatch centers. The unit would be connected to the transmitter via telephone lines.

A fixed station is a base station used in a system intended only to communicate with other base stations. A fixed station can also be radio link used to operate a distant base station by remote control.

An emergency communication system is necessary for first responders, who need to enter areas with no network coverage or damaged network infrastructure due to n

Chapter 5 - Communication EMS Communications System Components of an Emergency Communication System Base station Serves as a dispatch.

Overview Wireless communications Land surveying Computer networking See also In radio communications, a base station is a wireless communications station installed at a fixed location and used to communicate as part of one of the following: o a push-to-talk two-way radio system, or; o a wireless telephone system such as cellular CDMA or GSM cell site.

These frequencies are allocated by the Federal Communications Commission (FCC) for communication between fixed base stations and land mobile vehicle-mounted and portable transceivers.
