With North African countries seeking to maximise the massive renewable energy potential across the Maghreb region, giant wind and solar energy projects, including Morocco's 7.5 GW Amun solar PV ...

Countries in North Africa - including Egypt, Algeria, Morocco and Tunisia - are advancing cooperation with global partners to advance the development of integrated energy projects.

Discover the progress and challenges in Africa's wind energy sector, from successful projects to the barriers hindering expansion.

From the increased deployment of renewables in Morocco and Egypt to the exemplary pursuit of energy efficiency in Tunisia, the achievements across countries in North Africa can act as a ...

Africa's clean energy drive rose significantly in 2025. But next year signals a new wave of investment in renewable energy projects across the continent. Here are some to watch out for in 2026.

As a result, North Africa leads the African continent in new utility-scale wind and solar deployment, and is home to almost half of Africa's total installed wind power generation capacity, as ...

It will examine existing wind power projects and highlight the potential for energy storage solutions to enhance the reliability and efficiency of wind energy production.

The three projects - Oasis Aggeneis, Oasis Mookodi, and Oasis Nieuwehoop - with a combined capacity of 257 MW/1,028 MWh, are located in the Northern Cape and North West Provinces, ...

Explore how utility-scale solar and wind projects are transforming Africa's energy landscape. Learn how CLG Energy Transition Centre supports large projects.

Construction of wind solar and energy storage projects in north africa

Solar and wind projects across Morocco, Egypt, and Algeria now require large-scale storage systems to address intermittent power generation. Let's explore how modern engineering meets desert ...
