How much does a data centre cost in Vietnam?

The report reveals that the average construction cost for a mid specification standard data centre in Vietnam is USD 6,935,600 per megawatt,an increase of 3.5% y-o-y (equivalent to VND 175,470,680,000 per megawatt).

What is kilowatt per rack?

Kilowatt per rack (kW/rack) is the power assigned to a server rack in a data center. It is measured in kilowatts (kW) and represents the total power needed for all IT equipment in that rack. Colocation providers offer different power levels: Power density depends on server type,workload,and cooling efficiency.

Do colocation providers offer different power levels?

Colocation providers offer different power levels: Power density depends on server type,workload,and cooling efficiency. Colocation providers set power limits based on their electrical and cooling capacity. Higher-density racks allow businesses to use fewer racks,reducing costs and space.

Is Vietnam a good destination for data centre investors?

Vietnam continues to be recognized as an attractive destination for data centre investors. According to the Asia Pacific Data Centre Construction Cost Guide 2025 by Cushman &Wakefield,which covers 90 data centre clusters in 26 cities,Vietnam boasts some of the lowest construction costs in the Asia-Pacific region,second only to Taiwan.
