In support of this challenge, PNNL is applying its rich history of battery research and development to provide DOE and industry with a guide to current energy storage costs and performance metrics for ...

Energy storage system prices have fallen to their lowest level on record, dropping to a global average of \$117/kWh in 2025. The new figures come from BloombergNEF's Energy Storage...

A new Q1 2025 report from Anza, a subscription-based data and analytics software platform, analyzes list-price trends and key factors shaping pricing for energy storage systems.

Turnkey energy storage system prices fell sharply this year to a global average of \$117/kWh, down 31% from 2024. This marks the lowest level in BloombergNEF's annual cost survey, driven by continued ...

Despite an increase in battery metal costs, global average prices for battery storage systems continued to tumble in 2025.

Global average prices for battery storage systems fell by almost a third year-over-year, with sharp cost declines expected to continue.

This discussion aims to elucidate the implications of evolving energy storage costs and their impact on the energy landscape through an energy systems approach.

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an ...

Current status and expectations of energy storage system prices

Summary: Explore the latest pricing trends for energy storage systems in the US market. This guide breaks down residential, commercial, and utility-scale ESS costs, analyzes key price drivers, and ...
