nted Industry with Poor Profitability 09As of the end of 2021, there were 3,727 transportation enterprises and 9,858 individually owned inland shipping companies in the Yangtze River system, among which, more than 700 enterprises are registered in Jiangsu and Anhui provinces, and over 6,000 individually owned inland shi

Why is RSCC accelerating in the Yangtze River economic belt?

Jumping to 2020, the overall coupling degree of RSCC within the Yangtze River Economic Belt experienced considerable enhancement. This progression is primarily attributed to the intensifying influence of swift socioeconomic advancements on the ecological backdrop, a development indicated by a marked correlation between the two.

Why are did coefficients negative in the non-Yangtze belt?

The results show that the DID coefficients are significantly negative in the non-Yangtze belt and insignificant in the Yangtze belt. The reason for this may be that the economy of the non-Yangtze River belt tends to be more underdeveloped than that of the provincial administrative areas in the Yangtze River belt.

The Yangtze corridor is emerging as the world's largest clean-energy trade route, powered by HVDC, solar, and battery-electric vessels.
