What is a ground-mounted solar power system?

A ground-mounted solar power system is just what it sounds like - a system of solar panels that are mounted on the ground on your property, rather than on the roof of your house. A ground-mounted solar power system is just what it sounds like - a system of solar panels installed at ground level, rather than on the roof of your house.

How to install ground-mounted solar panels?

When you decide to have ground-mounted solar, you have two options on how to install them on the ground. The panels can get attached with a pole mounted system or a standard mount. Standard ground mount solar systems are mounted like rooftop solar in that the solar panels get attached to a metal frame.

Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land, opt for ground-mounted panels.

How much does a ground-mounted solar system cost?

Ground-mounted solar panels operate like a typical rooftop system but are generally more efficient. Ground-mounted solar panel installations cost about \$61,880 on average before incentives. They're usually more expensive than roof-mounted systems, but can maximize your renewable energy production depending on your roof's orientation and shading.

To learn more about which panel to choose for your ground ...
