These can control either or both (as required) of the visible light and infrared solar gain entering a building, and are usually blue, green, grey or bronze. Selective coatings and films, which allow visible ...

Double silver coatings enabled this generation of low-e glasses to maintain the same levels of visible light transmittance as single silver low-e coatings while increasing their ability to ...

The innovative composite sample of Tempered glass and resin (B3) showed the highest light transmission compared to other samples, so that its light transmission rate is 10 times that of other ...

Clear glass-based windows are dominated by a specular transmission, which makes a large difference between total and diffuse transmission. Because of specular transmission, windows ...

Light-transmitting photovoltaic glass is the core material of BIPV curtain wall, and its technical principle lies in embedding photovoltaic cells into double-layered tempered glass through a ...

Unlike traditional panels, bifacial designs capture sunlight from both sides, using reflected light to boost energy output by up to 30%. With higher efficiency and the potential to lower overall system costs, ...

This paper reports on the spectrophotometric characterization of glazings transmittance for the study of components of a modular facade system and its suitability for the climate of Portugal.

Triple and thick glasses are slightly less bright than double glasses. A sunscreen or tinted glass will automatically be less transparent and will have its light transmission rate reduced to 30% or even ...

Safety innovations including multi-stage fire suppression and gas detection systems have reduced insurance premiums by 30% for container-based projects. New modular designs enable capacity ...

Double-glass 30 light-transmitting components

These multi-functional coatings offer high selectivity solar protection on a neutral-looking glass (including neutral blue) for a wide range of applications such as fully glazed facades, roof glazing and large ...
