-----

To contribute to "Affordable and Clean Energy", Goal 7 of United Nations Sustainable Development Goals, this paper presents an economic evaluation of renewable energy microgrids ...

This study, for the first time, constructed a planning model for a rural electric-hydrogen microgrid incorporating hydrogen and electricity storage, and conducted comprehensive technical ...

The review encompasses two steps. First, the identification of studies in databases such as IEEE Xplore, Scopus, and SpringerLink related to performance analysis of microgrids; and second, the ...

Since frequency control and optimal operation of microgrids are two interrelated problems and involve multiple performance indicators, such as frequency deviation, operating cost, renewable energy ...

Due to the high investment costs of fresh batteries (FB), achieving a positive and efficient economy takes work. However, second-life batteries (SLB), whose capacity decreases by 20-30% ...

In this paper, an optimization procedure for the evaluation of technical and economic feasibility issues of a microgrid is proposed. This procedure aims to minimize investment and operation costs related to ...

This study collects publicly available financial data from 24 microgrid projects worldwide and investigates the economic performance of renewable energy microgrids by evaluating key ...

In this paper, with respect to different configurations and deployment schemes for port area microgrids, we first established a comprehensive evaluation system for port area microgrid ...

This chapter presents a comprehensive framework for modelling and economic analysis of microgrids, integrating both technical and financial dimensions. Microgrid modelling supports ...

# Economic and technical evaluation indicators of microgrids

To augment existing knowledge, our study presents an overview and a thorough analysis of microgrid performance evaluation. The evaluation encompasses two primary themes: bibliometric ...
