Is Finland covered by a 5G network?

Half of Finland's population is soon to be covered by a 5G network. While 5G networks are constructed and consumers adopt 5G phones in increasing numbers, the application of the new technology in industry and business is making progress.

What was the purpose of 5G Finland?

5G Finland was set up to create and pilot applications and services enabled by 5G. The network of 100 companies and 300 people was active during 2017-2020.

Can a commercial 5G network be used for critical defence communications?

In collaboration with the Finnish defence Forces and Nokia, we are pioneering in using commercial technology for critical defence communications. This trial meets the Defence Forces' needs and proves that commercial 5G networks can be utilised also in this domain," commented Jari Collin, CTO at Telia Finland.

Does a 5G trial meet the Defence Forces' needs?

This trial meets the Defence Forces' needs and proves that commercial 5G networks can be utilised also in this domain," commented Jari Collin, CTO at Telia Finland. Tommi Uitto, President of Mobile Networks at Nokia said the trial with Telia and the Finnish Defence Forces reflects its commitment to delivering 5G solutions for defence customers.

This groundbreaking trial, carried out in Finland in March, represents a significant milestone in advancing critical 5G capabilities for defense and other mission critical industries.
