Whether you are drilling the cannon's bore or a carriage hole for one of those long bolts, you should be able to drill a straight hole. Here is a method which will not fail to produce a straight, ...

Using hole saw to drill eight holes in one of the two foot circles. These holes are for drainage and screwdriver access to master turbine blade. See complete...

Not a tower punch, but I did pick up an Aermotor drill the other day off craigslist for \$5.00. Interesting, my 1935 catalog lists the drill with a 7/16" & 9/16" drill bit for \$4.00.

I ALWAYS have the bit grab and then my Milwaukee drill tries to break at least my wrist! Tower legs that use corner holes have caused me some pretty sore limbs and I've made some really ...

These holes will be used for the router operation and also used for mounting hardware to the rotors. This video contains intellectual property that may be used for non-commercial purposes only!

55 Gallon Drum Vertical Axis Wind Turbine (VAWT): This Instructable will enable you to build a Vertical Axis Wind Turbine out of mostly recycled materials. I was inspired to build a Savonius turbine from 55 ...

The utility model relates to a kind of drilling hole machine tool, generally is used for the use of external machine shell of wind driven generator boring.

Aggregate Resource Industries provides specialized rock drilling services to support wind turbine foundation excavation. When excavation must be performed in hard rock, perimeter drilling can ...

The known device is used for drilling holes in axial and radial direction of the blade root for accommodation of T-bolts. The T-bolts are used for connecting the (rotor) blade to a hub of the...

55 Gallon Drum Vertical Axis Wind Turbine (VAWT): This Instructable will enable you to build a Vertical

Generator wind cannon drilling holes

Axis Wind Turbine out of mostly recycled materials.I was inspired to build a Savonius turbine from 55 ...

If you're serious about creating electricity from your wind genera-tor, consult with an expert about the best way to erect a permanent tower and to connect the unit(s) to a wind storage and regulation system.
