To date, the most common plans for vegetation management under solar arrays are mechanical control (mowing), grazing sheep, and pollinator habitat, or a combination of these three.

Solar panels are a game-changer for clean energy. But did you know that trimming and tidying the grass and weeds around your solar panels is important for proper performance?

There are a variety of options you can choose for landscaping underneath ground mounted solar panels. Plants such as wildflowers, vegetables and grasses often grow well under solar panels.

Solar farms can even use sheep to trim grass around and under panels without damaging equipment. Solar grazing can promote biodiversity and supplement traditional mowing as a cost-saving measure.

Solar panels and grass can coexist peacefully and even benefit each other. By following the tips in this blog post, you can grow a healthy lawn under your solar panels and enjoy all the ...

The dilemma: How to mow under (the low side), between (down the middle) and under the high side, without throwing a rock or breaking the panels, efficiently. They are at a fixed 30 degree ...

If you have overgrown plants and trees surrounding your solar farm, learn the risks of blocking your panels and how to trim the greenery with these tips.

You've probably seen those vast solar farms stretching across fields - but have you ever wondered what's happening beneath those gleaming panels? Well, it turns out the choice of turf ...

I'll be installing solar panels on my farm. When I do, I am setting them over raised garden beds. Some vegetables do well in the shade.
