---

On July 23, the Bureau of Ecology and Environment of Honghe Prefecture, Yunnan Province, issued a public announcement on the acceptance of environmental impact assessment of Santaipu ...

The outstanding performance in the Longtan photovoltaic project in the Lancang River Basin once again confirms the leading advantages of Huasheng heterojunction modules in efficient power generation ...

Huasheng New Energy was established in 2020 and focuses on the research and development of silicon-based heterojunction solar technology and the mass production of products.

The core technology of Huasheng New Energy is heterojunction (HJT), and its biggest feature is the use of double-sided microcrystalline technology.

According to a recent article titled "HJT or TOPCon, It's a Question", Chairman Qu Xiaohua of Canadian Solar, HJT's power generation is 2% higher than that of TOPCon, based on a ...

Recently, Huasheng New Energy Technology Co., Ltd. successfully completed the full delivery of the 1.8GW heterojunction photovoltaic module project, setting another GW-level delivery ...

Advanced photovoltaic systems and wind turbine installations delivering clean electricity with 99.5% uptime and zero emissions. Revolutionary electrolysis technology producing 3 million tons of carbon ...

Through continuous exploration, they achieved breakthroughs in photovoltaic technology development on red mud stockpiles. The Institute's distributed photovoltaic design rapidly expands ...

In response, Huasheng New Energy implemented several strategic adjustments, including reducing production, joining industry alliances, modifying technology, and exploring new ...

# Huasheng Green Energy Solar Power Generation

This test compares the power generation performance of two 1MW photovoltaic power stations located in Boston (temperate climate zone, dip angle is 0 °) and Las Vegas (Desert climate ...
