IP65 Data Center Racks along the Belt and Road Initiative

What is an IP65 rated Data Centre?

An IP65 rating ensures that your equipment can withstand real-world conditions,from dust storms to driving rain. At Zella DC,both our Zella Pro and Zella Outback micro data centres are built to IP65 standards,giving you peace of mind,whether you're deploying in an office,on a mountaintop,or in the middle of the outback.

 What is IP65 & why is it important?

IP65 is an international protection ratingthat means a device is dust-tight and protected from water jets. For IT deployments in outdoor or harsh environments,IP65 ensures your equipment is safe from dust,rain,and environmental damage.

 What is an IP65 rated enclosure?

Protection from water jets from any direction. In short,an IP65-rated enclosure is sealed tightly enough to prevent any dust from entering and can withstand powerful jets of water -- making it ideal for outdoor and industrial environments. Most IT equipment was never designed to live outside.

 Are Zella data centres IP65 compliant?

At Zella DC,both our Zella Pro and Zella Outback micro data centres are built to IP65 standards,giving you peace of mind,whether you're deploying in an office,on a mountaintop,or in the middle of the outback. Don't forget to share this post!

What does IP65 mean? Learn why IP ratings matter for micro data centres and how IP65 protects your IT equipment.
