India's renewable leaders urge Budget 2026 to boost grid-ready clean power, storage, and transmission.

Union Budget 2026 places solar at the core of India's energy transition, boosting renewables, manufacturing, storage, grid resilience, carbon management and long-term clean power ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

India has set a target to achieve 50% cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by ...

The Indian government has launched extensive initiatives to enhance energy storage capacity, aiming for 60.63 GW by 2029-30. Key measures include financial support through VGF ...

Energy storage will be central to enable reliable, large-scale adoption of renewables to support India's transition to a clean, secure, and resilient power system, the Economic Survey ...

New Delhi: India will require a massive scale-up in energy storage systems to meet its clean power targets, with 61 GW of capacity needed by 2030 and nearly 100 GW by 2032, according ...

India has set a national target to meet 4% of its electricity demand with energy storage by 2030, translating to around 200-250 GWh of grid-scale storage capacity (Ministry of Power Order, 22 July ...

India Energy Storage Projects: A recent report by the India Energy Storage Alliance (IESA) predicts a dramatic increase in India's battery energy storage capacity to 5GWh in 2026, up from 507 ...
