We are a one-stop-shop that can supply every component required to complete a generator rewind in one kit, and we understand the tight timelines required for a repair to be successful.

Explore diverse perspectives on thermal insulation with structured content covering materials, benefits, applications, and innovations for energy efficiency.

The generator of the DeepWind Vertical Axis Wind Turbine (VAWT) concept is reviewed, discussing special challenges, detailing the function specification, briefly presenting the design ...

IRIS GuardII collects signals from up to two grounding and two voltage sensing brushes. Grounding brushes are normally installed but might require modification, while voltage sensing brush(es) should ...

One crucial aspect that significantly impacts the performance and longevity of wind turbines is insulation. In this article, we will explore the essentials of wind energy insulation, its types, ...

Discover best practices for electrical insulation in wind turbines to ensure safety, efficiency, and reliable power generation.

Our materials for slot liners, phase insulation, barrier applications and closures for low-voltage wind turbine generators are outstanding. We supply them in a wide variety of thicknesses to ...

Our offerings span specialized non-metallic wedges, electrical insulation and thermal management solutions, custom-length high-voltage wires, and more - all engineered to enhance both performance ...

Integrating mica insulation into generator assemblies reduces thermal and electrical stress on coils and windings, helping extend service life and minimizing unplanned maintenance events.

Insulation shaft installation for wind power generation

VPI Insulation System VPI Insulation System The Duraguard insulation system is a vacuum pressure impregnated epoxy-mica insulation The Duraguard system that insulation offers the following system ...
