SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) project in Ireland's Midlands from UK-based renewable energy ...

The acquisition of the Offaly project, which began development in 2018 under UK-based Low Carbon, will bring SSE's secured battery pipeline in Ireland to 300MW.

SSE has grown its secured battery energy storage system (BESS) pipeline in Ireland to 300MW with the acquisition of the 120MW/240MWh Thornsberry BESS project near Tullamore, ...

The project was acquired from UK-based renewable energy company Low Carbon in November 2024. This grid-scale project could power over *115,000 Irish homes for up to two hours at a time.

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling Wind Farm. Battery storage technology can ...

The acquisition of the Offaly project, which began development in ...

Construction is underway by Statkraft at Ireland's first 4-hour grid-scale battery energy storage system (BESS) in County Offaly, in Ireland's midlands. The 20MW, 4-hour BESS solution is ...

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key stakeholders and ...

ESB Networks described the project as a "great achievement for battery storage" in Ireland. Battery energy storage systems, often referred to as Bess, are regarded as a vital part of the...

Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and

Irish Communications Off-Grid Energy Storage Project

solar power. Today, in May 2022, we have 13 projects operating with a combined capacity ...

An Irish-South Korean consortium, however, is trying a different approach by building Europe's first fuel cell-powered data center -- with no reliance on the grid -- in County Offaly.
