Bifacial, Half Cell, All Black, Double-glass, TOPCON, N-TYPE, HJT Type 22.02% Panel Efficiency
China/USA Place of Origin 1762*1134*30MM Panel Dimensions Jinko/Trina Brand Name Model ...

Jinko's latest N-Type modules are loaded with features and technologies that deliver a high power performance and guarantee reliability and safety over a long lifetime.

The key technology determines the maximum efficiency.

N-type cells offer Jinko's in-house TOPCon technology with better performance and improved reliability. Fire Type 1 rated module engineered with a thick frame, 3.2mm front side glass, and thick backsheet ...

Jinkosolar's N-type TOPCon Tiger Neo panels demonstrate better power generation characteristics than conventional P-type modules under low light condition. Therefore, the effective power generation ...

The project exclusively utilizes Jinko Solar's N-type Tiger Neo bifacial high-efficiency modules, demonstrating outstanding performance in critical areas such as annual energy yield, ...

Chinese solar module maker JinkoSolar has set a new world record for n-type TOPCon solar cell efficiency, reaching 27.79%. The achievement was independently verified by Germany's...

TOPCon solar cells feature an ultra thin silicon oxide tunnel layer in between N-type silicon layers: monocrystalline wafer and polycrystalline film. This setup reduces recombination and enhances ...

Photovoltaic module technology has entered the n-type TOPCon era. This article provides an overview of Jinko's n-type TOPCon technology, highlighting Jinko's efforts to help improve the efficiency, ...
