What is the largest battery energy storage project in the Nordics?

SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest battery energy storage project in the Nordics. The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower.

What challenges does the Nordic power sector face?

The Nordic power sector, a global clean energy leader, faces new challenges as it enters the next phase of energy transition. Discover how the region is navigating rising electricity demand, complex risks and emerging technologies while striving to meet ambitious climate goals and ensure energy security.

What is the largest energy storage investment in the Nordics?

"It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid. "Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and enabling increased power production."

Who oversees the connection to the Nordic power grid?

The connection to the grid was overseen at the time by the Swedish minister for climate and the environment, Romina Pourmokhtari. Among her comments at the ceremony, Pourmokhtari said: "It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid."

The report communicates our shared perspective on key development trends in the power system and strategies to address emerging challenges. It also provides a status update on ongoing and planned ...

The Elektra Energy Storage Project, Sweden's largest battery storage project, is now fully operational. Located in Landskrona, southern Sweden, the project will provide ancillary services to help balance ...

Computer-generated picture of the future battery storage park in Finland. SEB Nordic Energy's portfolio company, Locus Energy, in collaboration with Ingrid Capacity, will build the largest ...

As the Nordic countries push forward with rapid electrification and record-breaking renewable energy

Latest Nordic power station energy storage policy

development, a new structural necessity is emerging in the energy system: the ...

In this instalment of our Nordic power sector transition series, we explore the emerging technologies in the region's energy transformation. From advanced storage solutions to nuclear ...

A report from BloombergNEF indicates global energy storage deployment is expected to exceed 300 gigawatts by 2030, reflecting a tenfold increase from 2020 levels. Finland's project aligns ...

To replace a large quantity of natural gas with power made from renewable energy sources before 2030, the renewable power production and transmission capacities must be expanded, with implications for ...

A strong increase in renewable energy is needed to meet the 2035 climate neutrality goal. Finland should promote an increased deployment of energy storage to boost the resilience and ...

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW ...
