Are Thurston County residents opposing a battery energy storage system?

About 15 residents, including a Thurston County fire chief, testified anew or reiterated their opposition on Tuesday to a battery energy storage system that has been proposed in south Thurston County.

Where would a battery energy storage system be installed in clay?

The three proposed in Clay would go into vacant, commercial or industrial spots on major town roads or near small business strips. If the town approves the projects, two private companies would install the battery energy storage systems, nicknamed BESS, on lots along Long Branch and Wetzel roads and on Goguen Drive.

How much space does a battery energy storage system need?

The battery energy storage system, or BESS, is proposed to occupy about 16,000 square feet of that overall site. In order to make the BESS a reality, Convergent needs a special use permit, but Thurston County hearings examiner Sharon Rice denied that permit in November following a public hearing in October.

China leads the expansion, surpassing 100 gigawatts of new-energy storage capacity in 2025 - more than doubling output in just twelve months, according to the China Energy Storage ...

Ford will convert plants in Kentucky and Michigan to produce lithium iron phosphate batteries, including 20-foot DC container systems of the type used by data centers, utilities and large ...

U.S. small farms face rising energy costs, unstable grid access, and diverse power needs, making PV+storage systems a viable solution. However, intelligent management is key to ...

Energy storage is expected to play a significant role in enabling the global data centre build-out, although the commercial and financing models developers will use are evolving, Energy ...

Chinese multinational Envision Energy has unveiled the world's most energy dense, grid-scale battery energy storage system packed in a standard 20-foot container.

Clifton Park, New York, has formally banned battery energy storage projects within the town, closing the door

on future installations and signaling a growing tension between local safety ...

Shanghai-based Envision Energy unveiled its newest large-scale energy storage system (ESS), which has an energy density of 541 kWh/m², making it currently the highest in the industry.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage ...

While early adopters continue leading in deployment, activity across the country shows clear demand for utility-scale energy storage as a solution to rising electricity prices and soaring ...

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.
