-----

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning, Mexico is emerging - according to OLADE - as a regional benchmark for energy ...

According to the Power Sector Development Plan 2025-2039, Mexico will add 19,954 MW of renewable energy and 5,000 MW of energy storage by 2030. Solar PV will account for 58% of ...

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be equipped with energy storage systems accounting for ...

According to the regulations promulgated in March 2025, all new solar and wind power projects must be equipped with battery systems equivalent to 30% of their installed capacity, with a ...

The plan targets the addition of 24,954 MW of new clean capacity by 2030, with 5,000 MW dedicated to battery energy storage systems (BESS) to manage the intermittency of solar and ...

On March 18, 2025, President Claudia Sheinbaum enacted a sweeping energy reform package that restructures Mexico's power sector in favor of state-owned companies.

Mexico's energy sector stands at a critical crossroads. While the country boasts immense potential in solar and wind resources, the path to a sustainable and secure energy future is still hampered by a ...

Mexico's new regulation mandating battery systems for solar and wind projects positions it as a model for energy storage integration in Latin America, according to a new report.

Based on a comparative policy analysis between Mexico, the US and Germany, this paper seeks to provide policy recommendations to incentivise the deployment of energy storage ...

# Mexico Wind Power and Energy Storage Policy

Thanks to the country's geographical conditions, Mexico has great potential for solar and wind energy, which makes it an ideal candidate for the implementation of energy storage systems to ...
