How big is the micro inverter market?

Image © Mordor Intelligence. Reuse requires attribution under CC BY 4.0. The micro inverter market size stands at USD 4.17 billion in 2025 and is forecast to expand to USD 10.21 billion by 2030, representing an 18.23% CAGR over the period.

How big is the solar microinverter market in 2025?

The solar microinverter market is valued at USD 5 billion in 2025 and is projected to reach USD 26.77 billion by 2035, expanding at a CAGR of 18.3%. The string inverter segment is anticipated to grow fastest among product types, with a CAGR of 5.7%.

Is the solar microinverter market poised for transformative growth?

Overall, the solar microinverter market is poised for transformative growth, driven by evolving energy consumption patterns, improved return on investment for solar customers, and the expanding role of distributed renewable energy in global energy systems.

What is the market share of micro inverters in 2024?

By phase configuration, single-phase systems led with 72% of micro inverter market share in 2024, whereas three-phase platforms are projected to register the fastest 19.1% CAGR through 2030. By communication technology, wired solutions held 91% revenue share in 2024; wireless platforms are poised for a 20.4% CAGR to 2030.

There is an increasing trend of installing solar panels in residential and commercial buildings. These products are particularly attractive for these installations due to their modularity and ...

String inverters are likely to remain favored in standardized, high-capacity systems, while microinverters are expected to be chosen for more complex or decentralized installations.

Global Solar Micro Inverter Market Summary. The Global Solar Micro Inverter Market is projected to witness strong expansion, rising from USD 35.36 Billion in 2024 to USD 188.83 Billion by ...

What Is The Micro Inverter Market Size 2026 And Growth Rate? The micro inverter market size has grown rapidly in recent years. It will grow from \$4.11 billion in 2025 to \$4.9 billion in 2026 at a ...

Micro PV inverter price trend

Delve into detailed insights on the Micro PV Inverters Market, forecasted to expand from USD 1.2 billion in 2024 to USD 3.8 billion by 2033 at a CAGR of 14.3%. The report identifies key growth drivers, ...

Overall, growing scale, semiconductor innovations, and competitive positioning are expected to lower prices by 8- 10% annually over the next five years, further accelerating micro ...

By communication technology, wired solutions held 59.83% of the micro inverter market share in 2025, but wireless protocols are set to expand at an 18.72% CAGR through 2031.

There is an increasing trend of installing solar panels in residential ...

Micro inverters typically cost 15-30% more than string inverter systems on a per-watt basis, creating affordability challenges for residential customers and small commercial installations.

Analyzing data from the historical period (2019-2024) and projecting trends through the forecast period (2025-2033), with a base year of 2025, this study provides in-depth insights into ...

The Solar Micro Inverter industry is experiencing rapid expansion driven by increased adoption of solar photovoltaic systems at residential and commercial levels. Advanced technological integration and ...
