What is a Microgrid Symposium?

The purpose of the symposiums is to exchange information internationally, yet informally, on the current state of microgrid research, and to identify key technical, economic, and policy issues that should be addressed by future work. The symposiums approximately rotate around three regions: Europe and Africa, The Americas, and Asia and Oceania.

What is Microgrid Certification Training?

Microgrid Certification Training is a 3-day course designed for all engineers who want to learn, design, or operate microgrids. It is also suitable for power traders to understand modern microgrid technologies and independent system operator personnel. The training covers understanding energy management systems (EMS) in microgrids, including centralized or decentralized microgrids.

Why do we need microgrids & off-grid energy systems?

As data centers, EV uptake, electrification of industrial processes and other factors drive growth in demand for electricity in North America, microgrids and off-grid energy systems are seen as a key solution.

What is the microgrid & off-grid Innovation Forum?

The 20th edition of the Microgrid & Off-Grid Innovation Forum, September 30 - October 1, 2025 in Austin, TX brings together technology innovators, project developers, utilities, energy providers and policy makers for focused networking and in-depth information sharing at the cutting edge of microgrids in North America.
