What are modular crude oil refineries?

Modular crude oil refineries are prefabricated processing plants designed to distill crude oil into a range of petroleum products, including naphtha, kerosene, diesel, residual fuel oil, and off-gas.

What is a modular refinery?

Modular refineries offer scalable solutions ranging from 1,000 to 40,000 BPD and support digital twin and PLC automation for enhanced control and easy maintenance. Their plug-and-play design ensures quick startup and future expansion, providing a cost-effective, reliable, and agile option for the modern oil and gas industry.

What is a mini refinery?

The Mini-Refineries are skid mounted, modular crude oil distillation units (CDU) which process from 50,000 to 450,000 metric tons (1000 - 9,000 BPD) of crude oil per year and are capable of producing a variety of finished products including naphtha (straight run gasoline), kerosene, arctic and summer diesel and fuel oil.

Why should you choose AmeriSource for a mini crude oil refinery?

As pioneers in mini crude oil refineries, Amerisource delivers these refineries in prefabricated modules, making installation more cost-effective and time-efficient. We provide comprehensive engineering, procurement, and fabrication services for modular crude oil refinery equipment.

Outdoor Cabinet Energy Storage System (Air-Cooled) - Modular Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and ...

When you need a quick solution for gasoline and diesel production, turn to UOP's Modular Refinery. Our process experience, combined with a pre-engineered approach, allows you to ...

The Mini-Refineries are skid mounted, modular crude oil distillation units (CDU) which process from 50,000 to 450,000 metric tons (1000 - 9,000 BPD) of crude oil per year and are capable ...

Modular Refineries have become of solution of choice for any refining and upgrading unit project that consumes up to 30,000 barrels of oil per day. In this range of sizes, conventional stick-built refineries ...

Modular outdoor cabinetized type for oil refineries

Explore our high-quality modular refinery products, including hydroskimming refineries, designed specifically for the oil and gas industry. These customized modular refineries offer flexible, ...

Learn about the efficiency of modular crude oil refineries at Amerisource Energy. We offer high-efficiency solutions in crude oil refining.

The right outdoor industrial enclosure for oil & gas processing needs to offer simplified maintenance, water and dust-proof environmental seals, and integrated cooling capability.

Discounts on modular outdoor cabinetized oil refineries connected to the grid Modular crude oil refineries are prefabricated processing plants designed to distill crude oil into a range of petroleum products, ...

What Is a Modular Refinery? A modular refinery is a compact, skid-mounted oil processing plant engineered for fast deployment and efficient crude oil refining. Unlike traditional ...

A modular refinery is a type of petroleum processing facility built using prefabricated modules or units that are assembled on-site. Unlike traditional refineries, which are constructed as ...
