Who is energy storage NL?

Energy Storage NL is the subject matter expert on energy storage and conversion technology. We promote awareness and knowledge about the current and future role for energy storage and conversion in the energy system. Energy Storage NL represents the broad energy storage sector towards governments and external stakeholders.

What technologies are developing in the east of the Netherlands?

Focus on three key technologies that are already developing strongly in the east of the Netherlands: electrical energy engineering, electrochemical energy storage and sustainable drive systems. Smart energy Hub: Smart decentralised energy system that produces, stores and uses sustainable energy locally.

Why should the Netherlands accelerate the energy transition?

The Netherlands must accelerate so as not to miss opportunities. Energy storage is the missing link in the energy transition. Without large-scale deployment of batteries, heat buffers and hydrogen storage, the Netherlands risks falling behind in Europe and becoming more dependent on foreign players.

Are grid managers allowed to buy energy in the Netherlands?

Grid managers are not allowed to buy energy on the market themselves in the Netherlands. Examples of regional grid managers are Liander and Stedin. entrepreneurs who want to become active across borders. Prohibits the placing on the market of certain batteries manufactured with mercury or cadmium. Encourages the recycling of (parts of) batteries.
