Our researchers constantly research and bring you updated lists of renewable power generation projects using solar, wind, perpetual motion, footstep power generation as well as hybrid generation systems.

To combat this, renewable energy has to start replacing fossil fuels - not just adding to the supply. Around the world, enormous and ambitious renewable energy projects are operational and ...

The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy technologies, focusing on their current challenges, opportunities, and policy ...

Few studies have optimized global deployment of photovoltaic and wind power. Here we present a strategy involving construction of 22,821 photovoltaic, onshore-wind, and offshore-wind...

Since solar PV and onshore wind are the cheapest technology options to add new power generation in China, facilities were receiving 15- to 20-year contracts at provincial coal benchmark prices and very ...

In 2024, solar photovoltaics (PV) were, on average, 41% cheaper than the lowest-cost fossil fuel alternatives, while onshore wind projects were 53% cheaper. Onshore wind remained the ...

Covering a wide array of topics--including solar power, wind energy, hydropower, energy storage solutions, and power grid advancements--this platform offers timely news articles, insightful ...

We are focusing our efforts on the fast-growing solar, onshore wind and offshore wind segments, leveraging the many advantages that these abundant, clean, flexible, efficient and ...

2025 has been a challenging year for renewables. The new tax law, commonly referred to as the One Big Beautiful Bill Act, rolled back many clean energy tax credits and imposed new restrictions, ...

New Energy Photovoltaic and Wind Power Generation Project

In our latest Short-Term Energy Outlook, we forecast that wind and solar energy will lead growth in U.S. power generation for the next two years. As a result of new solar projects coming on ...
