---

Former Justice Minister Ionas Nicolaou has submitted a proposal for private companies to install 800 megawatts of energy storage capacity at existing solar parks, seeking state subsidies of ...

Due to the large increase in the proportion of renewable energy such as wind energy and solar, it is necessary to configure energy storage in the distribution grid to make it economically and ...

In this deep dive, we'll unpack why these standards are like the "Swiss Army knife" for modern power grids and how they're reshaping everything from solar farms to your neighbor's ...

The city's new energy storage subsidy policy directly addresses this gap, offering up to EUR6,000 for residential systems and EUR50,000 for commercial installations.

As of March 2025, Nicosia has emerged as a Mediterranean leader in renewable energy adoption through its groundbreaking energy storage policy framework. This 1,200-word analysis unpacks how ...

The inherent power fluctuations of wind, photovoltaic (PV) and bioenergy with carbon capture and storage (BECCS) create a temporal mismatch between energy supply and demand.

In 2023, Nicosia rolled out a mandatory energy storage ratio requiring new solar projects to integrate storage systems equivalent to 30% of their peak capacity [1].

We started the project to estimate the energy storage systems (ESS) requirements for 40 GW rooftop PV integration, but the scope was enlarged to include total ESS requirements in the country till 2032.

Nicosia gets EU funds for energy storage. The Republic of Cyprus has secured 40 million euros from the Just Transition Fund for energy storage facilities, addressing the inflexibility of its electricity system in ...
