OverviewHistoryGovernment policyProjectsFarmingChallengesPublic receptionPakistan's solar energy boom, which accelerated in 2023 due to falling global solar panel prices and increased imports from China, led to widespread adoption of solar systems among wealthier individuals and farmers, often supported by government subsidies. Many of these users disconnected from the national electricity grid. With fewer consumers, a subsequent increase in energy prices from fossil-fuel-based power plants followed to sustain profits and maintain aging infrastructure. This increased the co...
