Iberdrola and its partner Prosolia Energy said they secured approvals from the Portuguese Environment Agency (APA) for the construction of Europe's largest photovoltaic plant and the fifth-biggest worldwide.

As part of its transformation drive, Galp has taken the final investment decision and started construction works to build one of Europe's largest electrolyzers to produce green hydrogen, and a ...

Since 2023, Hyperion has been accelerating its transformation into an independent power producer (IPP) focused on Portugal, Spain and Romania, and currently has over 266 MW of ...

Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target. Storage facilities can effectively deliver essential voltage and frequency ...

Portuguese energy firm Galp and Powin, a US-based energy storage integrator, completed the commissioning and injected the first electrons of stored energy to the grid from a utility ...

Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy. According to the ...

Galp has announced construction on BESS projects in Spain and Portugal using equipment from inverter and BESS firm Sungrow.

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Portugal new energy storage power station construction

In Portugal, the introduction of new auctions that support the development of storage infrastructure is accelerating this transition, ensuring that renewable generation can be integrated ...
