I designed a slide out system for my Class-B Winnebago Travato. Its 1500 watts using Sunpower commercial panels with 2 Victron 100/50 controllers that are getting maxed out during ...

Our heavy-duty slide rails for solar panels provide unbeatable strength, easy installation, and long-term durability, ensuring your system stays secure and performs at its best.

You want to place the upper crossbar (with the stopcatch) low enough so that you can easily stick in a screw driver while standing on the small ladder, but also high enough that you can ...

Yup, exactly - no precision rollers necessary. Just need to make sure that it can go out, maybe 1" away from the vehicle, and still be supported appropriately.

Connect a wire/string from the edge of the panel in the direction of the slide and hang the end of the string over a pulley so you have the string hanging down.

I've been looking at ways to do something similar with two Renogy 100W panels to slide out the sides of a bed rack. Best bet I've seen so far is stainless-steel heavy duty cabinet sliders (I ...

You can either change the angle at your van to catch the rising and setting sun or install your solar panels with a kickstand to pop them out once you are parked and catch more rays.

Here's a relatively simple design for slide-out panels which I mocked up using 1" t-slot extrusion and the matching double-keyed bearing pad. Since the bearing pad is UHMW plastic, there ...

in the previous video I gave the idea and parts needed ... in this video I describe how the prototype was built. ...more. Audio tracks for some languages were automatically generated. Learn more.

Includes: T-Slot rails, PV & vehicle mounting brackets, and all hardware. Mounting kits available for MB
