Delta is proud to introduce its modular rack cabinet designed for maximum performance, convenience, flexibility and safety in high density IT room environments.

Systemair data centre and server room cooling solutions can easily be customised to your application case, ensuring they will operate as efficiently and smoothly as possible, no matter if they're exposed ...

An innovative line of chilled-water-cooling solutions designed to optimise temperature and capacity control in high-performance, large co-location and hyperscale data centres.

Tropical climates could make racks of hot-running data servers even hotter. But researchers in Singapore are now testing ways to cool this trend, sustainably.

In a recent panel discussion at Data Center World 2023, we delved into Singapore's latest sustainability standard SS697, which charts the roadmap to increase tropical data center ...

than the IT equipment. Higher temperatures can impact equipment reliability. Exposure to warmer temperatures, coupled with the fact that usable life cycle of power equipment. typically longer than IT ...

We guarantee that data center HVAC and power will be functioning 100% of the time, excluding scheduled or emergency maintenance. Otherwise, we apply a 5% credit of your monthly fee for each ...

Schneider Electric liquid cooling solutions are purpose-built for AI and high-density IT environments. With over a decade of experience cooling racks above 400kW, our advanced technologies like CDU ...

Key suppliers, notably Schneider Electric and Vertiv, are consolidating share by bundling racks with integrated power and cooling subsystems that address Singapore's tropical climate and ...

Singapore Data Center Rack High Temperature Type

In 2022, data centres accounted for about 3% of global energy consumption, a figure projected to rise to 4% by 2030. 1 This invention introduces a novel spray-cooled data centre designed for tropical ...
