What is the cost of solar panels in San Diego?

As of August 2024, the average solar panel system costs \$2.36/W including installation in San Diego, CA. For a 5 kW installation, this comes out to about \$11,800 before incentives, though prices range from \$10,030 to \$13,570. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

Are solar panels a good investment in San Diego?

Solar panels are worth it in San Diego, CA. Factors like the cost of electricity, incentives, climate, and the angle of your roof impact how quickly you'll break even on your investment compared to other areas in the U.S.

How can you reduce the cost of solar in San Diego?

Solar is a major purchase, but you can get the price tag to come down a bit by being an educated shopper. Taking advantage of incentives and rebates and shopping around for quotes can bring down your cost of solar in San Diego, CA.

What is the cost of a 10 kW solar system in San Diego?

Doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system, which would cost around \$23,600 in San Diego, CA. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill.
