Facing issues with solar lights not working? Learn how to troubleshoot and fix solar light blinking problems on our blog.

A solar light that remains illuminated through the night rather than deactivating during daylight hours likely has a malfunctioning light sensor. This sensor is designed to detect ambient light ...

Why Do My Solar Lights Turn on During The Day? Do You Leave Solar Lights on All The time? How Do You Keep Solar Lights Working properly? Can You Use Alkaline Batteries to Fix Solar Lights? Conclusion Contrary to popular belief, solar lights don't need to be left on all the time to function properly. They will often charge even when turned off. In fact, shutting them off for 72 hours encourages the battery to charge completely. This gives the lights time (over the 3 days in the sunlight) to reach full functioning capacity. Do this regularly (once a week). See more on tipshandyman solar-reserve Why Do My Solar Lights Come On During The Day? Solar lights are a new trend these days. They remain switched off during the day and come on at night to provide pleasant, ambient lighting in your backyard, ...
