This is the first publicly announced utility-scale solar project with U.S.-built panels that's expected to qualify for the domestic content tax credit. It will supply electricity for multiple Google ...

The Edwards Sanborn Solar and Energy Storage project incorporates the highest capacity solar farm in the United States with the largest battery storage system in the world.

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.

It is currently the largest single-capacity solar power base built on a coal mining subsidence zone in China. The power station is expected to generate 5.7 billion kilowatt-hours of ...

Startup energy venture company SolarReserve (created via seed funding), US Renewables Group, and United Technologies were the original owners of Tonopah Solar Energy LLC, the owner and operator ...

So far, 12 "photovoltaic sheep farms" have been built in Hainan prefecture. In 2023 alone, these farms sold 13,000 "photovoltaic sheep," bringing herdsmen a total income of 11 million yuan, ...

Solar and batteries will dominate US power plant construction in 2025. Explore the trends shaping our energy future today!

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Solar power generation base has been built

The project is partly located on the Edwards Air Force Base in Kern County, California, home to many other large solar projects in the US.
