With the increasing cost of power being driven further and faster by increasing bird demands, it is time poultry growers seriously consider opportunities in solar power.

In this poultry farm case study from an agriculture business in Georgia, you'll see how financially beneficial solar energy proved to be for his bottom line. Then you can consider your own long-term ...

Our team of experts can assist you in designing and installing a solar-powered poultry farm system tailored to your specific needs. Contact us today to learn more about our solutions and ...

In the present work, a pilot study at the Agricultural University of Athens aimed to decarbonize an experimental laying hen's facility while improving animal welfare.

Looking after more than 128,000 free-range laying hens across 4 sites, Ivory Arden's electricity needs are constantly growing. The use of solar panels and battery storage has ...

Switching to solar power for your chickens might seem like a big deal, but it's worth it. Modern poultry farming is changing because solar power is cheaper and greener, giving us a reliable ...

Solar systems are revolutionizing the way farmers operate, offering cost-effective, eco-friendly power solutions that simplify day-to-day operations. In this blog, we'll explore how solar ...

At Agrotop, we guide poultry growers through detailed techno-economic studies (using tools like HOMER[®]) to design the optimal PV, battery and backup systems for each farm.

Our recent initiative aimed to decarbonize experimental laying hen facilities while enhancing animal welfare by integrating a RES system. The farm was upgraded with an innovative heat pump (HP) for ...

Solar power generation in laying hen farms

As a poultry farm owner, integrating solar photovoltaic (PV) systems into your operations can bring about transformative benefits. Here's a closer look at how solar power can positively ...
