State tax credits for installing solar PV generally do not reduce federal tax credits--and vice versa.

Final thoughts on the solar tax credit changes This policy change represents a significant shift in the federal approach to solar incentives for homeowners. But solar energy remains a valuable ...

In addition to the energy efficiency credits, homeowners can also take advantage of the modified and extended Residential Clean Energy credit, which provides a 30 percent income tax credit for clean ...

Starting January 1, 2026, the residential solar tax credit disappears completely for customer-owned systems. Third-party owned systems (leases and PPAs) continue to qualify, with ...

Learn more about the solar tax credit by state, and how you can benefit from this program along with other ways to save on solar.

Commercial taxpayers may now also choose a Production Tax Credit (PTC) for solar instead of an ITC. The PTC rate is 1.5 cents (adjusted for inflation, it is presently 2.6 cents). The full value of the PTC is ...

In an effort to encourage Americans to use solar power, the US government offers tax credits for solar systems. The Inflation Reduction Act renamed and extended the existing solar tax ...

Tax credits and rebates make solar more affordable in different ways. A tax credit is claimed when you file your tax returns, while a rebate is a partial refund you get after buying solar...

Comprehensive Cost Coverage: The ITC covers far more than just solar panels, including installation labor, permitting fees, inverters, battery storage systems (3+ kWh), and even sales tax - ...

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.
