The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe.

As such, Tunisia is actively advancing its renewable energy sector - with a focus on solar power - to diversify energy sources and reduce greenhouse gas emissions in the sector.

Tunisian utility STEG is planning to build a 400-600MW pumped hydro energy storage plant, for a 2029 commissioning date. STEG, or the Sociéte tunisienne de l'électricité, ...

This article explores how battery storage, pumped hydro, and innovative technologies can transform Tunisia's power infrastructure while addressing challenges like solar intermittency and peak demand ...

The TEREK program is expected to support Tunisia in achieving its goals to mobilize US\$2.8 billion in private investment to add 2.8 gigawatts of new solar and wind capacity by 2028, ...

Tunisia's energy storage power generation sector is transforming faster than a desert sunset. With solar irradiation levels hitting 5.3 kWh/m²/day and wind speeds reaching 9 m/s in coastal areas, this North ...

Tunisia has awarded four new solar power projects to international companies for the production of 500 megawatts of electricity as part of a drive to expand the share of renewable energy ...

In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy. While STEG continues to resist private investment in the ...

In Tunisia, the High Commission for Private Electricity Generation, which met on Tuesday at the Government

Tunisia s new energy solar power generation and energy storage equipment

Palace in the Kasbah under the chairmanship of Prime Minister Sarra ...

Recent initiatives in Tunisia demonstrate how transitioning to renewable energy sources could bring affordable power to communities and reduce poverty. However, these efforts also ...
