The UK is providing funding for the development of two-way charging technologies that could turn electric vehicles into backup power sources and help the country meet its climate goals.

Ministerial forewordForeword from OfgemExecutive summaryChapter 1: IntroductionChapter 2: Making smart charging the affordable, convenient choice for EV driversChapter 3: Providing the right business landscape for EV smart charging productsChapter 4: An energy system ready for EV smart chargingAnnex 1: Full list of measuresAnnex 2: GlossaryBy 2030 there will be up to 10 million electric vehicles on our roads, as the UK speeds ahead on its jou...In this context, smart charging for EVs - whether at home, in the workplace, or on the street - provides a win-win-win situation. The electricity used is cleaner and greener; drivers pay less to use it, with the option of returning it either to their home or to the grid should they wish; and overall system costs are r...We have already come a long way in developing and deploying smart charging technology. As of last ...But we know that we need to move further and faster if we are to achieve our net zero ambitions. In March 2022, the government set out its vision for EV charging infrastructure in the UK EV infrastructure strategy. Today's joint action plan, developed with Ofgem, builds on that vision and sets out the steps ...See more on gov.ukbidstatsUK - Ev Charging ContractsFind UK government contracts. Procurement notices containing ev charging. 264 matched over past year.

In addition to the PCR 2015 and UCR 2016, there are also several other laws and regulations relevant to the procurement of EV charging infrastructure*, which must be considered and are as follows:

All the anticipated electric vehicle (EV) batteries by 2040 would offer around 2.5 terawatt hours of storage - enough to store much of the UK's surplus solar power generated at bright summer...

Ofgem has launched a new cap and floor investment support scheme, unlocking billions in funding to build major Long Duration Electricity Storage projects for the first time in 40 years.

Customers can select individual services or an end-to-end service via the lot structure. All relevant mature
