Should you invest in lithium stocks?

Multiple industries from transportation, energy production, and storage, the smartphone industry, and others make a strong case for investors to allocate a part of their portfolio to lithium stocks. Just consider the fact that the current penetration of electric vehicles in total car sales globally is still low.

What lithium stocks are poised for massive growth?

Our guide on lithium provides a deep dive into what lithium stocks are poised for massive growth in the near future. Albemarle Corporation is one of the largest lithium producers in the world, with locations on six continents. The chemicals company has a significant lithium business that develops a broad range of lithium compounds.

Is Lithium Americas a speculative stock?

Lithium Americas is a highly speculative stock that will attract enterprising investors, but most investors will want to tread lightly with these speculative bets. Clean energy is the future, and these companies are leading the way. Natural gas must be liquefied to travel long distances. These companies are getting it done.

What is lithium used for?

Lithium companies mine and process lithium into compounds that are critical in the production of electric vehicles, batteries, and grid storage. As such, it's an essential metal in the modern economy. In addition to lithium mining and production companies, QuantumScape develops solid-state lithium batteries for electric vehicles.
