Photovoltaic (PV) technologies dominate China's solar industry, with roughly 99% of China's solar power capacity. Chinese PV manufacturing accounts for the vast majority of global PV production.

The increased power capacity would mark a major milestone in the country's long-standing effort to build a cleaner power system.

Today, covering an area of 609 square kilometers, this solar power base boasts a power generation capacity of 8,430 megawatts, making it the largest in the world, according to Qeyang, deputy director ...

Construction on the world's largest photovoltaic (PV) power station project recently commenced in Angduo, located in Mangkang, Southwest China's Xizang Autonomous Region, the ...

At a Xuzhou-based new energy vehicle industrial park, a large digital display screen flashes real-time data on solar power output and carbon dioxide reduction. With 52,000 square meters of ...

While the names of the private placement targets were not mentioned, Shichuang Energy said on Sept. 23 that it plans to link arms with Tongwei Group, the world's largest producer of ...

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global ...

As a wholly-owned subsidiary of Zonergy, Zigong Xingchuan Photoelectric Co., Ltd. (hereinafter referred to as "ZXPCL") is a physical technology platform bearing the development concept of Zonergy ...

"Distributed" solar power generation on roofs of houses, factories and airports is spreading across country, but curtailment rate is also rising.
